AI at work

How leaders and staff rate the same AI tools

A Ricoh survey put the same questions to 506 decision-makers and 1,511 employees in the US and Canada

Source: Ricoh USA, 2026 Workplace Technology Adoption Gap, published 21 October 2026. Survey of 2,017 full-time staff in the US and Canada, September 2026. Answers are self-reported.

91%

of decision-makers said they are confident their AI investments deliver the value they expected

53%

of employees said AI creates friction or extra work for them

Source: Ricoh USA, 2026 Workplace Technology Adoption Gap, published 21 October 2026. Survey of 2,017 full-time staff in the US and Canada, September 2026. Answers are self-reported.

81%

of decision-makers said their organisation invests in new technology faster than it helps employees learn to use it

Source: Ricoh USA, 2026 Workplace Technology Adoption Gap, published 21 October 2026. Survey of 2,017 full-time staff in the US and Canada, September 2026. Answers are self-reported.

71%

of decision-makers said employees are usually asked for input before new technology is rolled out

43%

of employees said that usually happens

Source: Ricoh USA, 2026 Workplace Technology Adoption Gap, published 21 October 2026. Survey of 2,017 full-time staff in the US and Canada, September 2026. Answers are self-reported.

Both sets of answers are opinions. A baseline of how work runs before a tool goes in shows what the tool changed.
